

## **Walking Forward** *Together*

### **Engage and Serve with Purpose**

We will have a consistent way of expressing who we are and what we do.

We will support our sponsored organizations to affirm their purpose, express their identity and animate the mission of Catholic health care through relationship building, education, and use of the reserved powers.

### **Look Upstream for Future Opportunities**

We will hold at least one board retreat with a skilled facilitator to assist us with visioning about where we can have the greatest impact in the future, especially in response to the social determinants of health.

We will also engage in “learn-as-we-go” visioning that complements outcomes of the retreat, identifying and carrying out small scale projects that will enable us to learn, clarify and deepen our understanding of future directions, collaborations and partnerships.

We will be innovative and forward thinking in our planning for financial and organizational sustainability, while allowing for investment in new opportunities.
